

In Highschool I did as much as I could. I played baseball, football, basketball, tennis, and swim. As well as clubs like World Affairs club, FCCLA, and I served as Student Body President my senior year. During my presidency, my goal was to get as many students as possible to take part in our school activities whether it was showing up for games and dressing up for homecoming events and such. I took pride in leading our student section whether it was home or away and stuff like that is what I'm looking forward to doing here as well. I most always bring the energy and enthusiasm especially when it comes to public speaking. Confidence is something I do not lack and I'm always willing to do what I need to do. In conclusion, student government is in my blood, so I want to be part of that here at western and it will be great.
