

I am Regan Evans, a freshman at UM Western. I love everything outdoors such as hiking, fishing, hunting, and camping. I enjoy being around animals and feeling like I am helping the community I am in. Right now, I am majoring in Pre-Vet and eventually want to be a wildlife veterinarian. I graduated from Highwood High School this spring where I was very active in several groups such as Student Council, community service club in my youth group, and volleyball all four years, as well as Honors Society and track and field for three years. In Student Council, I was a student representative all four years and my class secretary for two. My senior year of volleyball I was a team captain, and in Honors Society I was a senior member for two years. Through the years in these clubs and organizations, I learned several valuable skills, such as time management, how to listen to my peers and bring up possible changes that resulted from that, hard work, and resilience. I think that there could be many things changed or improved upon regarding the campus, classes, and life at Western in general. Mostly I would like to improve on how we market to incoming students. This spring I noticed that Western did not do the greatest job at promoting the school. Also, once I got here I realized that some of the best qualities of Western were not even mentioned when I was researching this school. I think this needs to change because I believe Western is a true treasure and many students would benefit greatly by going here instead of somewhere else. I want to be a student senator because I love helping the people around me and making a difference in day to day life. I think it is super important to be involved with your community because everyone, not just yourself, benefits from it. I would bring a new perspective on things to the student senate, along with hard work, dedication, and a true desire to help and improve life at UM Western. Thank you for your consideration!
